AI-Powered Medical Image Diagnosis System

Streamlit + Google Model

Content

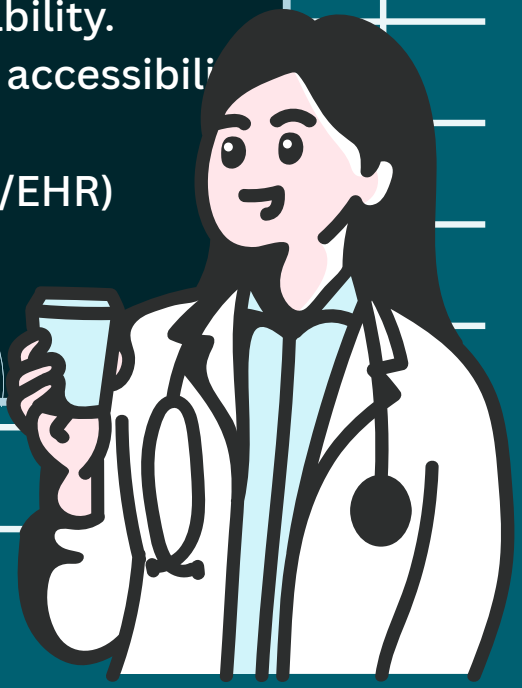
- A next-generation AI solution that simplifies radiology image analysis for patients.
- Automatically processes CT scans, MRIs, and X-rays to generate accurate diagnostic insights.
- Aims to make complex medical data understandable through patient-friendly reports.

Problem & Solution

Problem

- Patients receive technical reports to understand
- Manual analysis time-consuming
- Limited specialized radiologists in urban areas

Solution

- Patients upload CT, MRI, or X-ray images.
- Images processed by AI Model
- AI generate medical report
- Built with Streamlit for interactive experience.


- Empowers patients with clear understanding of their medical data.
- Reduces dependency on radiologist availability.
- Faster diagnosis and improved healthcare accessibili
-
- Integration with hospital databases (PACS/EHR)
- Real-time doctor collaboration
- Multi-language report support
